

NEXT GENERATION FIREARM CARE

Dutch + German specialists

Manufactured in the Netherlands

Battlefield tested

WHO WE ARE?

is a synergy of expertise
from specialists in the
Netherlands and
Germany.

As a result, we deliver a high-performance solution that ensures **fast, effortless maintenance** while providing **sterile cleanliness, practicality, and long-term reliability** - even in extreme conditions.

◦ Since 2014

◦ Battlefield tested

OUR **DUAL** MISSION

Civilians

Recoil solution
one reliability

Professionals

- Fast maintenance
- Deep cleaning
- Easy application
- Long-term firearm preservation
- Maximum practicality

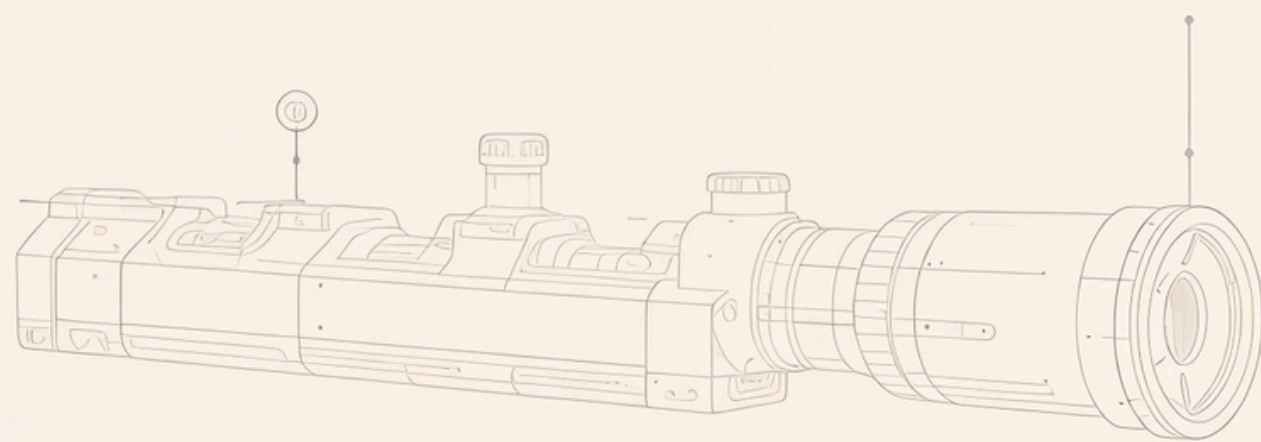

- Reliability under extreme conditions
- Corrosion protection
- Heat resistance
- Thermal signature reduction
- Mission-critical performance

Designed to simplify maintenance for civilians and maximize operational readiness for professionals.

INNOVATION + QUALITY

Built for Extremes

Reliable anywhere, anytime

CLEANING AND MAINTENANCE SPRAYS

Our cleaning and maintenance products are designed for all firearm types, ensuring effortless application, deep penetration and fast results.

**Reducing maintenance time
to just 10–15 minutes**

ACCESSORIES

add-ons for better usability

Quality materials

Precision cleaning

Easy to use every time

PAINTS

Tactical paints with heat resistance up to 110 °C reduce visual and thermal signature, and can be easily removed with standard solvents.

Built for every environment

SYNTHETIC GUN OIL

HAM004/HAM005

Synthetic base with high lubricating properties. Non-flammable, frost-resistant and excellent penetration capabilities for effective removal of various contaminants. Neutral composition — safe for wooden, rubber and polymer parts of firearms.

CARBON REMOVER RECOIL

HAM002

Thanks to its chemical formula, it quickly and effortlessly removes even the most stubborn carbon and residue buildup. Speeds up cleaning of barrels, gas systems, muzzle brakes, and flash hiders. Eco-friendly and safe for the environment.

400 ml

CLEANER & DEGREASER

HAM001

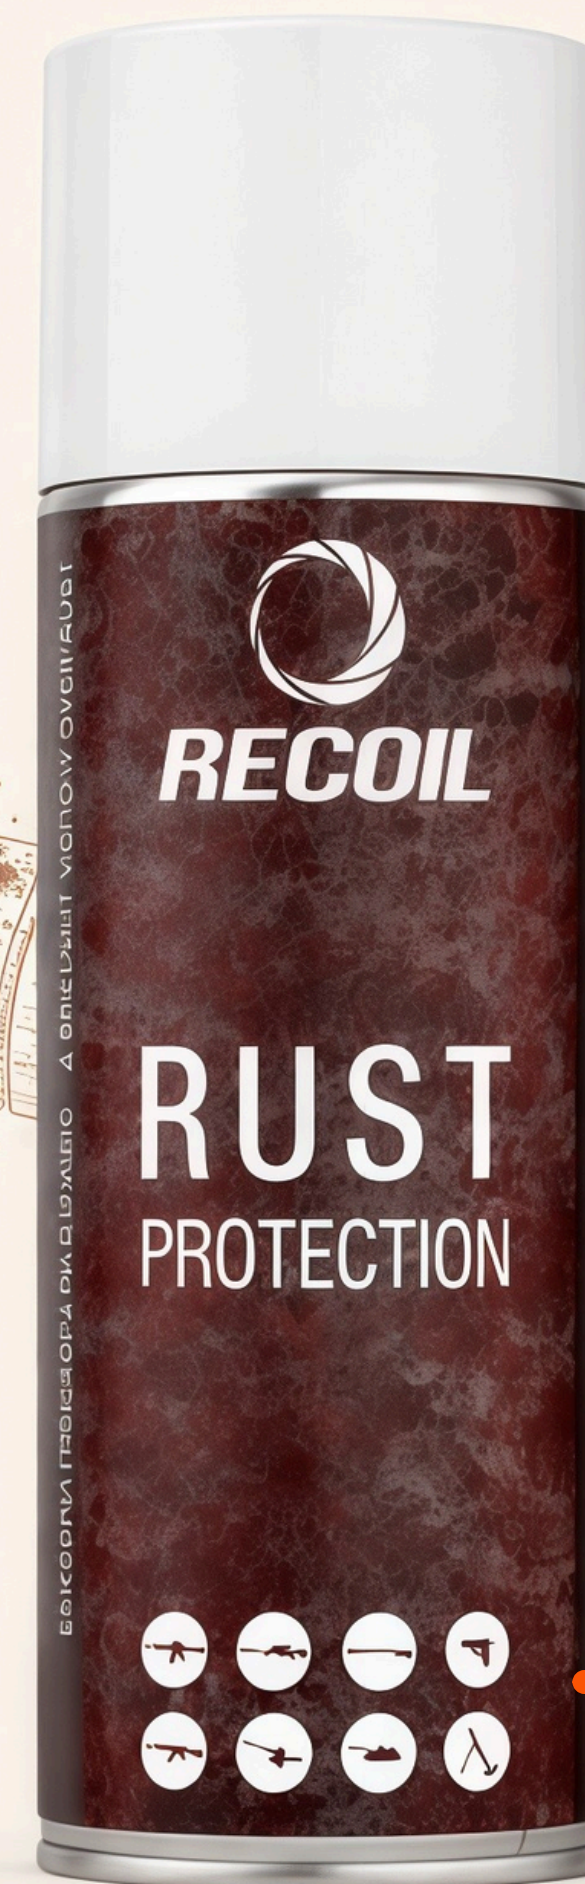

Two-in-one solution: combines a pneumatic spray system with a cleaning formula (5-bar pressure in the canister). Quickly removes dirt and old grease from weapon mechanisms without full or partial disassembly. Evaporates after application, leaving the surface ready for lubrication.

RUST PROTECTION

HAM006

Rapidly displaces moisture from metal pores and forms a transparent protective layer. Ideal for humid or salty marine environments. Prevents rust, neutralizes acids, lubricates metal parts and loosens rusted or frozen components. Protects against fingerprint oxidation on all types of firearms.

BORE CLEANING FOAM

HAM007/HAM008

Accelerates barrel cleaning from copper deposits and powder residue. Free from mineral oils — will not thicken or interfere with trigger mechanisms. Dense foam adheres well to barrel surfaces. Foam color changes based on contamination type: blue = copper; gray-black = carbon residue.
